EDUCATION

Bachelor's degree (Computer Science) - Second Class Upper 2019 - 2023
Babcock University

Master of Science (Computer Science) - In progress 2025 - Present
Babcock University

EXPERIENCE

Frontend Software Engineer November 2024 - Present
Addosser Microfinance Bank

- Ensured cross-browser compatibility and responsiveness for all web projects, enhancing accessibility for users across devices.
- Collaborated with backend developers to integrate RESTful APIs, ensuring seamless data flow and real-time updates for the user interface.
- Developed responsive websites and mobile applications tailored to banking needs, ensuring seamless user experiences across platforms.
- Debugged and resolved complex UI/UX issues, improving application functionality and user satisfaction.

Frontend Software Engineer December 2023 - October 2024
Ecobank Transnational Incorporated

- Design and development of user interfaces that simplify complex financial transactions, improving customer engagement and satisfaction across 33 countries.
- Designed and developed user interface for Rafiki chatbot that allows agents to engage with customers across 33 countries.
- Integration of Rafiki chatbot with Microsoft Copilot.
- Developed responsive websites and mobile applications tailored to banking needs, ensuring seamless user experiences across platforms.

Information Technology Support Officer January 2022 - June 2022
Ecobank Nigeria

- Provided rapid technical support for hardware and networking, minimizing service disruptions for customers.
- Maintained 99% uptime for IT infrastructure across multiple branches, supporting seamless banking operations.

PROJECTS

Saleko E-commerce Platform | *React, TypeScript, Redux Toolkit*

- Implemented a secure wallet system with real-time balance updates, integrating RESTful APIs to facilitate smooth transactions and payment processing for buyers and sellers.
- Collaborated with backend teams to integrate secure payment gateways and ensure compliance with industry-standard encryption protocols, safeguarding user data and transactions.

Saleko Merchant Platform | *React, TypeScript, Redux Toolkit*

- Implemented a secure wallet system with real-time balance updates, integrating RESTful APIs to facilitate smooth transactions and payment processing for buyers and sellers.
- Engineered role-based dashboards for sellers to manage inventory, track sales, and analyze performance metrics, boosting operational efficiency and seller satisfaction.

Smooth-Capital Investment Platform | *React, TypeScript*

- Built a responsive web application that provides clients with expert investment solutions, enabling them to grow, preserve, and transfer wealth with confidence.
- Implemented secure authentication flows and encryption standards to safeguard sensitive financial information and enhance user trust.

Onboarding Portal | *React Native*

- Designed and developed an innovative onboarding portal to streamline the integration of new recruits, enhancing user experience and engagement.
- Facilitated a seamless onboarding process that aligns with the company's goals of sustained growth and employee satisfaction.

Rafiki Chatbot (Virtual Assistant) | *React*

- Implemented support for multiple languages to accommodate users from 33 countries, providing seamless interaction in their native languages.
- Developed conversational workflows for various banking operations, including account management, balance inquiries, fund transfers, and loan processing.

MySME application | *Kotlin, React Native*

- Built a multilingual, mobile-first app for 10,000+ SMEs, supporting 33 currencies and real-time transactions.
- Integrated APIs with the bank's core system, ensuring 99.9% uptime for critical banking features.
